TEACHING EXPERIENCE

1. IN CLINICAL MEDICINE

As a senior house officer and medical registrar I taught undergraduate and postgraduate students on a formal basis. I was a lecturer on the MRCP courses at the Whittington and The Royal Northern Hospitals and I helped to organise the clinical part of the MRCP examination at the Whittington Hospital.

2. IN RADIOLOGY

Radiographers:

I have lectured on aspects of general radiology and CT on courses organised by the Royal Postgraduate Medical School and South Bank University.

Radiologists:

I lecture regularly at various courses held at the UMDS and participate in courses organised by the Royal College of Radiologists, the British Institute of Radiology and the British Postgraduate Medical Federation. I lecture frequently on interventional radiology nationally and internationally.

RESEARCH FUNDS OBTAINED

I have been able to attract financial support for several research projects from the companies with which I have co-operated. The major grants are as follows:

1. Equipment worth approximately £30,000 for research in self-expandable biliary endoprotheses (Medinvent SA). (1989)
2. £120,000 for a research fellow in CT (Siemens). (1989)
3. Equipment worth approximately £20,000 for research in prostatic stents (Medinvent SA). (1990)
4. Laboratory research on Palmaz prostatic stents (approximate cost £5,000) been funded by Johnson and Johnson Interventional Systems. I carried this out at the University of Texas in April and May 1990. Equipment for a prospective comparison of stenting with prostatectomy in patients will also be funded by JJIS and the estimated cost is £40,000. (1990)
5. £30,000 for a spiral CT facility. (1990)
