

## Curriculum Vitae 2019

Dr Peter Goh Yu Tang is currently the Clinical Director for the Department of Radiology Mount Elizabeth Hospital, Singapore. He is a senior consultant in Vascular and Interventional Radiology. His main interests are Interventional Oncology, Endovascular Aortic Aneurysm Repair and Musculo-skeletal intervention.

Dr Goh graduated from the National University of Singapore in 1987 and obtained his fellowship in radiology from the Royal College of Radiologists ( U.K.) in 1994. He has been performing interventional procedures now for more than 20 years. He spent one year as an overseas fellow to Professor Andreas Adam at Guy's Hospital in London, from 1997-98 where he trained under the tutelage of Professor Adam and Dr John Reidy – both pioneers in the field of Interventional Radiology. Upon his return to Singapore, he became a Fellow of the Academy of Medicine (Singapore) in 2000.

Dr Goh spent the initial part of his career in Tan Tock Seng Hospital. He moved to Mount Elizabeth Hospital in 2000, where he has been practising since. He became Clinical Director of the Department of Radiology, Mount Elizabeth Hospital in 2010.

Dr Goh is an active member of the Singapore Radiology Society and its sub-section of Cardio-Vascular and Interventional Radiology. He held the chair for the subsection from 2004-2010. He is a member of the Society of Interventional Radiology (SIR), USA and the Cardio-Vascular and Interventional Radiology Society of Europe (CIRSE). For the recent Asia-Pacific Congress of Cardio-Vascular and Interventional Radiology 2014, Dr Goh held the position of Treasurer. Currently, he is a regional proctor for Sirtex for SIRT using Y-90 microspheres. He was previously a regional proctor for Medtronic for EVAR.

Dr Goh has an extensive resume of lectures on interventional radiology and has participated in numerous meetings and workshops both in Singapore, the surrounding region and in the Asia-Pacific as well as Europe. His most common lectures are on Radiofrequency Ablation for Liver, Lung and Renal tumours, Loco-regional Treatment of Hepatocellular Carcinoma, Selective Internal Radiation Therapy for Liver Tumours, Percutaneous Vertebroplasty, Disc Nucleoplasty and EVAR.
