

CURRICULUM VITAE

Dr Alex. A. L. Tang 陳紹發

MBBS(UM), M.Med Radiology(UKM)

FRCR(UK),FAMM

Fellowship in Vascular & Interventional Radiology

(Hammersmith,Imperial College of Medicine, London)

Fellowship In Interventional Radiology (Guy's, London)

Fellowship In Interventional Neuroradiology (Oxford)

Senior Consultant Vascular & Interventional Radiologist
Head of Clinical Radiology

Dr Tang graduated from the School of Medicine, University of Malaya in 1988; and had his radiology training at the National University of Malaysia in 1995. He completed his fellowship in vascular & interventional radiology at the Hammersmith Hospital, Imperial College of Medicine, University of London, and Guy's Hospital, London in 1998. He furthered his training in interventional neuroradiology at the Radcliff Infirmary, Oxford in 2000.

Dr Tang has been an active IR, both in clinical practice and academic activities. He is the president of the Malaysian Society of Interventional Radiology, and the past president of the APSCVIR 2008-2010.

He also pioneered the establishment of VIR Center and Services in the Kuala Lumpur Hospital in 1998, and the VIR Center, Subang Jaya Medical Center in 2000.

He was a visiting consultant in interventional neuroradiology and had assisted in the development of Interventional Neuroradiological Services in the University of Malaya Medical Center, Kuala Lumpur, between 2001 to 2007, and the University Medical Center, Ho Chi Minh City, Vietnam, between 2003 to 2008.

He is currently holding the position of senior consultant vascular & interventional radiologist at the Subang Jaya Medical Centre, Kuala Lumpur since 1999.

He had delivered more than a hundred didactic lectures in many regional and international IR congresses. He was the organizing chairs of numerous international interventional radiology conferences and teaching workshops with live case

transmissions since 2002. He pioneered the establishment of the Multidisciplinary Oncology Symposium Malaysia (MOSM) in 2017, an international multidisciplinary congress with live transmissions. He also establishes the Masterclass in Interventional Radiology, a highly technical and comprehensive regional advance teaching workshop in interventional radiology for the young interventional radiologists. It has been one of the high-quality teaching course favoured by the regional young IRs.

His major interests are endovascular revascularisation, stroke salvages, interventional oncology and management of vascular malformations, etc., apart from the routine VIR services and the high end cross sectional diagnostic imaging services.
